

# ANIBS SOLAR

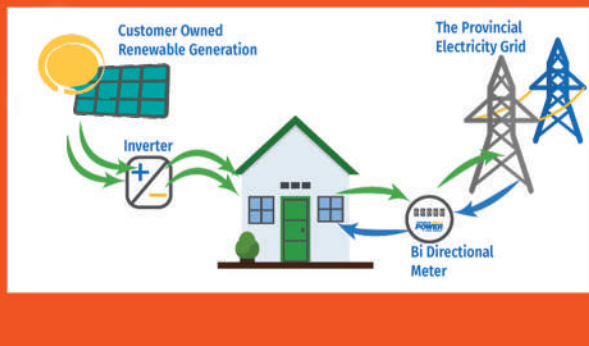

ENJOY FREE POWER

CLEAN & EASY ENERGY FIXED COST

SHINE WITH SUN ADOPT SOLAR  
SMART CHOICE FOR SMART PEOPLE.

## Solar Technology

Electricity produced by Solar Plant will be consumed by the customer. Excess will be exported to grid and in case of shortfall grid energy will be imported. At the end of billing cycle customer will be billed on the net of electricity consumed - difference between import and export. Net metering Policy will provide dual benefit-Enjoy Free Electricity & Reduction in Usage of Expensive Grid Power.

### Smart Solar City Concept

### Solar in Industries & Factories

Electricity is as costly as it is essential. But not Any More. Anibs Solar gives You a Choice to Produce Your Own Electricity and Save the Expenses on Power Resource.

### Solar in Commercial Complexes

Going Solar in Commercial Complexes Has Multi Sided Benefits. It increases the Value of Real Estate, It Lowers the Electricity Bills and it Generates Excess Electricity to Sell Back to The Grid. Thus, Making 3x of Your Investment.

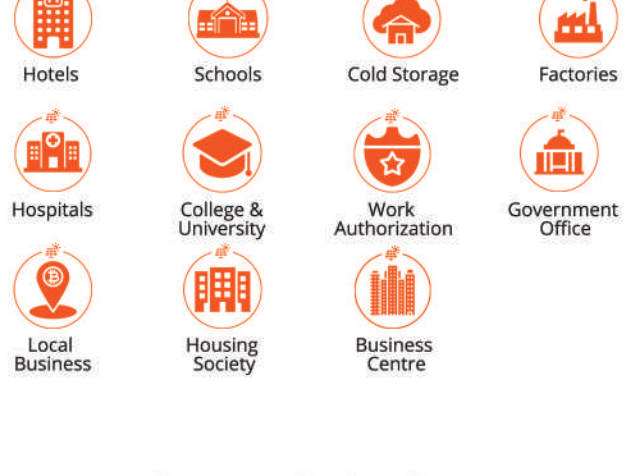

### Solar for Residential Societies

Not Only Does it Provide Power to Your House, Solar Panels Reduces the Heating of The Roof. This Provides Additional Saving on Electricity Bill & Provides Comfort to Top Floor Residents.

## MAJOR BENEFITS

- The electricity slab rates comes down to the lowest price slab
- Since most of the taxes in electricity bill as on per unit basis, the overall impact on saving is very high.
- 33% casback in the form of tax benefits under Section 80 (l) A paid immediately.
- Saves on expensive and polluting conventional power.
- Saves on buying power from the utility.
- Provides clean, continuous supply of electricity.
- Save more then you spend. Grow your savings.

## CUSTOMERS WE WILL BE HAPPY TO SERVE.
